

Orange revolution in Ukraine

## Through the eyes of Fulbrighters

“Nas bahato i nas ne podolaty!” – “There are many of us and we can’t be overcome!” This slogan of the Orange Revolution in Ukraine has been confirmed not only by millions Ukrainians who went on demonstrations in all maidans (squares) of all Ukrainian cities and towns, but also by thousands of foreigners (not only of Ukrainian origin!) throughout the world. American Fulbrighters in Ukraine doing their research or lecturing also expressed their personal attitude to the

events which they happened to witness during their Fulbright grant. Being on ground zero of the action they proved that intellectuals are public, that for scholars who live and work in the global world globalization is very concrete. We are grateful to our American colleagues who take an active interest in Ukraine.
